Frost

Smart Safe

Reduce cash handling risk

Designed as an integrated service that allows you to have more control over your cash, Smart Safe, a product offered through a partnership with Loomis and Brinks, is an electronic validating safe that assists in reducing risk and minimizing operating expenses. Smart Safe works by eliminating gaps in the cash-handling process. Once your cash is validated into Smart Safe, it is as good as money in the bank. Deposits are counted, logged and secured until an armored carrier comes to collect them.

How it works

An employee feeds cash directly into the safe

Smart safe reports the cash total to an armored carrier daily

Credit is applied to your account the next business day

An armored vehicle transports deposits to our commercial vaults

Both you and Frost can access deposit totals and generate reports

Features

- Issues detailed receipts for each currency deposit
- Accepts bills of nearly any condition, fed in either direction
- Integrates with existing POS systems

Benefits

- Real time deposit balancing, including printable reports
- Counterfeit detection
- Improved funds availability
- Reduced cash processing risks
- Improved cash processing efficiency
- Remote access to cash reporting
- Manage deposits from one or all locations
- Safety of your cash and your employees

We're here to help
