

Frost Value Equity Fund

Investor Class Shares* Ticker: FADVX CUSIP: 00766Y737

March 31, 2019

* Formerly Class A Shares

★★

Overall Morningstar Rating™

Overall rated 2 stars for the period ending 3/31/19 out of 1,096 US-domiciled Large Value Funds. Morningstar rankings are based on risk adjusted returns, and the Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Style Box

Firm Overview

- Frost Investment Advisors, LLC formed 2007
- \$4.4 billion in mutual fund assets and \$4.7 billion assets under management in the Investment Advisor as of 3/31/19
- A wholly owned non-banking subsidiary of Frost Bank (“Frost”) which was founded in 1868
- Frost is one of the largest Texas based banks with \$31.7 billion total financial assets as of 3/31/19

Investment Objective

- Seeks long term capital appreciation and current income

Investment Philosophy

- Seeks to identify and invest in companies that are expected to generate superior returns on equity, strong free cash flows, and have the wherewithal to support an increasing dividend payout over time.
- The Adviser considers dividends to be both a signal of underlying financial health and a meaningful component of total long-term equity returns.
- The Adviser will focus on those companies that have sustainable and growing free cash flows to support profitable expansion of their businesses, as well as excess cash to return to shareholders.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This and other information may be found in the Fund's prospectus, which may be obtained by calling 877.713.7678. Please read the prospectus carefully before investing.

Mutual fund investing involves risk including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually 958 the greatest impact because it is included in all three rating periods. As of 3/31/19, FADVX was rated against 1,096 US-domiciled Large Value funds over a three-year period, 939 over a five-year period and 691 over a ten-year period. With respect to these funds, FADVX received a rating of 2 stars for the five-year and ten-year periods and 1 star for the three-year period. Past performance is no guarantee of future results.

Morningstar style boxes reveal a fund's investment strategy by displaying, for equity funds, the fund's investment style and the market capitalization of the stocks owned.

Price to Earnings is a valuation ratio of a company's current share price compared to its per-share earnings. Price to Book Ratio is used to compare a stock's market value to its book value. Beta is a measure of risk in relation to the market or benchmark.

The Frost mutual funds are distributed by SEI Investments Distribution Co., which is not affiliated with the Advisor or its affiliates.

The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-book ratios and lower forecasted growth values. Investors cannot invest directly in an index. Beta is a measure of risk in relation to the market or benchmark.
